

CYCLE #01 · PIPELINE BRIEFING · 2026-09-22

## 20 accounts for review

Hugh — the organizations below sit above several third-party property managers, on public evidence — a filing, their own website, a job post, deal coverage. Each was scored against the buyer profile we built from 1ledgr.com and comes with the person to approach and a suggested opening in 1LEDGR's voice: ten in the Greater Toronto Area, ten in California. We have not accounted for who you already know — strike anyone you would rather reach yourself. Nothing has been sent to anyone.

---

### GREATER TORONTO AREA

#### 1. Firm Capital Property Trust FIT 97 / 100 · A+

Small/mid-cap REIT · Toronto · TSX: FCD.UN

##### THE EVIDENCE

Their own site: the Trust is “externally asset and property managed,” and its strategy is “partial interest acquisitions from existing ownership groups” — each asset arrives on the seller's manager. Direct. [Source](#)

##### PORTFOLIO

Diversified: multi-residential, industrial, net-lease retail, professional space; TSX: FCD.UN; co-ownership / partial-interest acquisitions

##### THE READ

Co-ownership means several managers by design: every partial interest brings its partner's manager, chart of accounts and format with it, and public reporting puts a deadline on the consolidation every quarter.

##### WHO TO APPROACH

Jonathan Mair, C.A. — SVP & CFO. Also Robert McKee — President & CEO; Sandy Poklar — COO.

##### THE APPROACH

*The Trust is externally managed and grows by buying partial interests from existing ownership groups — so each new asset arrives on the seller's manager and the seller's chart of accounts. How are partner-managed assets brought onto one basis for the Trust's quarterly reporting today? 1LEDGR does that step: every manager's statements read as they come, mapped to one standard, every figure tied to its source page. Thirty minutes on three partners' statements?*

## 2. True North Commercial REIT FIT 93 / 100 · A+

Small/mid-cap REIT · Toronto · TSX: TNT.UN

### THE EVIDENCE

Their own site: “value creation through the use of best-in-class, third party property managers.” Direct. [Source](#)

### PORTFOLIO

37 properties, 4.4M sq ft, \$1.2B assets, 5 provinces; office; externally asset-managed by Starlight

### THE READ

Thirty-seven buildings in five provinces, third-party managed, publicly reported. Consolidation sits either at the REIT or at the asset manager — one question before the pitch, and worth approaching both.

### WHO TO APPROACH

Martin Liddell — Chief Financial Officer. Also Daniel Drimmer — CEO.

### THE APPROACH

*Thirty-seven buildings in five provinces, each with a third-party manager, and a public reporting calendar. Where does the consolidation sit today — at the REIT or at the asset manager — and how many formats land in it each quarter? 1LEDGR reads every manager's statements, whatever the format or chart of accounts, and puts them on one basis with a trail from every figure back to the page. A pilot on three managers' statements would show it on your own portfolio.*

## 3. Fiera Real Estate Canada FIT 84 / 100 · A

Fund / asset manager · Toronto

### THE EVIDENCE

Their own site: “strategic collaboration with outsourced property managers, external development managers, and leasing teams in every market where we invest.” Direct. [Source](#)

### PORTFOLIO

C\$8.4B AUM (as of June 30, 2026); 255 assets, 29M leasable sq ft, 23 projects in development (portfolio page); industrial, retail, office, multi-res, development, financing across Canada; 100+ employees

### THE READ

Their own sentence is the opener. Above the profile's size ceiling, so the first question is whether reporting runs centrally or strategy by strategy — if centrally, one team is mapping every market's managers each quarter.

### WHO TO APPROACH

Erin Shirley-Wong — VP, Asset Management. Also Jeremy Lipchitz — Senior Manager, Financial Reporting; Judy Shin — Director, Finance.

#### THE APPROACH

*Your site says you work with outsourced property managers in every market you invest in. Across 255 assets, how many charts of accounts does that come to each quarter — and who owns the mapping? 1LEDGR reads each manager's statements as they come, whatever the format, and puts them on one basis with every figure traceable to the page it came from. Thirty minutes on three of your managers' statements would show what that looks like on your own numbers.*

---

### 4. Peakhill Capital FIT 80 / 100 · A

Lender · Toronto

#### THE EVIDENCE

Inferred: CMHC-insured multifamily lending requires an annual operating statement per property, per borrower, per manager — across four Canadian metros and the US. [Source](#)

#### PORTFOLIO

Multi-family, mixed-use, industrial, retail loans across North America; CMHC-insured, conventional, US bridge, CMBS, life-co; \$350M credit facility to accelerate multifamily/CMHC lending

#### THE READ

The most statement-hungry lending product in Canada, and a new facility that says the book is about to grow. No finance or underwriting lead is public — the only named person is in institutional sales — so the contact has to be found before the approach.

#### WHO TO APPROACH

Head of Underwriting or CFO — to be identified. Chaim Karpel, VP Institutional Sales, is the only published name.

#### THE APPROACH

*CMHC-insured multifamily lending means an operating statement per property, per borrower, per manager, every year — across four metros and the US, and about to grow with the new facility. How many of those does underwriting spread by hand? 1LEDGR reads each statement as it arrives and puts every borrower on one basis, with each figure traceable to its source page. Thirty minutes on three borrowers' statements would show what monitoring on one basis looks like.*

---

### 5. Forum Asset Management FIT 77 / 100 · A

Fund / asset manager · Toronto

#### THE EVIDENCE

Inferred: assets in nine provinces and states run from one Toronto office by about 74 staff across three asset classes, with no property-management arm named on the site; student housing and US multifamily are conventionally third-party operated. [Source](#)

## PORTFOLIO

\$3.9B AUM; apartments, student housing, office, retail (+ PE, infrastructure); assets in ON, QC, MB, BC and KY, TX, CA, NJ, NY; ~74 staff

## THE READ

Nine jurisdictions, one office, and a named real-estate finance function — the shape of an owner assembling a quarterly LP pack from several managers' statements.

## WHO TO APPROACH

Lara Iannucci — CFO, Real Estate. Also Mike Chong — VP, Real Estate Finance; Aly Damji — Managing Partner, Real Estate.

### THE APPROACH

*Apartments, student housing and offices across nine provinces and states, run from one Toronto office. How many property managers report into the real-estate finance team, and how many formats does the quarterly LP pack start from? 1LEDGR reads each manager's statements as they come, maps them to one standard, and keeps every figure tied to the page it came from — so the pack is assembled from one basis, not re-keyed from nine. Thirty minutes on three managers' statements?*

---

## 6. Timbercreek Financial FIT 76 / 100 · A

Lender (MIC) · Toronto · TSX: TF

## THE EVIDENCE

Inferred: borrowers are “sophisticated commercial real estate investors” financing multiple properties; a national book of stabilized income property means statements from every borrower's manager, in every format. [Source](#)

## PORTFOLIO

TSX: TF; mortgages on stabilized income-producing multi-res, office, retail in urban markets across Canada

## THE READ

The strongest lender-side fit in Canada. A national book of stabilized assets is a national inflow of operating statements, none of them on the same basis.

## WHO TO APPROACH

Patrick Smith — Managing Director, Head of Global Credit. Also Tracy Johnston, CPA, CA — CFO; Michelle Adair — VP, Global Credit.

### THE APPROACH

*A national book of stabilized income property means operating statements from every borrower's manager, every quarter, in every format. How many does the credit team spread by hand each year before the first covenant test? 1LEDGR reads each statement as it arrives and puts every borrower on one basis, with each figure traceable to its source page. Thirty minutes on three borrowers' statements would show what continuous monitoring looks like.*

---

## 7. Greyspring Apartments FIT 67 / 100 · B

Asset manager (Greybrook × Marlin Spring JV) · Toronto

### THE EVIDENCE

Inferred: scattered multifamily in primary and secondary markets across Canada with no national on-the-ground platform — several local managers, one owner. [Source](#)

### PORTFOLIO

2,000+ units, C\$375M AUM; multifamily in primary and secondary markets across Canada

### THE READ

The closest shape on this list to the demo form's "12 properties across 4 managers": roughly fifteen to twenty-five buildings, local managers, and two parent LPs waiting for numbers.

### WHO TO APPROACH

Karl Brady — President.

### THE APPROACH

*Two thousand units in secondary markets across Canada, each building with a local manager, and two parent LPs waiting for the numbers. Who consolidates for the parents today, and how long does it take from the last statement to the first report? 1LEDGR reads every manager's statements as they come, whatever the format, puts them on one basis, and keeps every figure tied to its page. Thirty minutes on three of your managers' statements?*

---

## 8. Atrium Mortgage Investment Corporation FIT 65 / 100 · B

Lender (MIC) · Toronto · TSX: AI

### THE EVIDENCE

Inferred: income-property collateral across Ontario and Western Canada, monitored from one office; each borrower's operating statements arrive on that borrower's manager's basis. [Source](#)

### PORTFOLIO

TSX: AI; one of Canada's largest MICs; commercial mortgages to developers and investors across Ontario and Western Canada; managed by Canadian Mortgage Capital Corp

### THE READ

A lender, not an owner — the profile's second buyer. The pain is borrower monitoring: statements from every borrower's manager, spread by hand before each covenant test. A new CFO, appointed December 2025, makes it a natural first call.

### WHO TO APPROACH

The CFO appointed in December 2025 — confirm the name before sending. Also Robert Goodall — CEO & Founder.

#### THE APPROACH

*Every borrower on your book reports on its own manager's chart of accounts, in its own format, and someone on your team spreads those statements by hand before the first covenant test. Roughly how many a year is that? 1LEDGR reads each statement as it arrives and puts every borrower on one basis, with each figure traceable to its page — continuous monitoring instead of annual spreading. Thirty minutes on three borrowers' statements would show it.*

---

## 9. Firm Capital Mortgage Investment Corporation FIT 65 / 100 · B

Lender (MIC) · Toronto · TSX: FC

#### THE EVIDENCE

Inferred: the mortgage arm of the Firm Capital organization lends against income property owned and run by third parties; each borrower's statements arrive on that borrower's manager's basis. [Source](#)

#### PORTFOLIO

TSX: FC; commercial and residential mortgage lending arm of the Firm Capital organization

#### THE READ

The lending arm of the house that owns the Trust — a second buying centre, with its own borrowers' statements to spread. Inferred evidence caps the grade; the Trust conversation carries the introduction.

#### WHO TO APPROACH

Michael Carragher — VP, Mortgage Investments. Also Ryan M. Lim — Corporate CFO; Shan Gu — VP, Corporate Accounting.

#### THE APPROACH

*Your mortgage book is secured on income property that other people own and run — every borrower reporting on its own manager's chart of accounts, in its own format, before your team can test a covenant. How many of those statements are spread by hand each year? 1LEDGR reads each one as it arrives and puts every borrower on one basis, with each figure traceable to its page. Thirty minutes on three borrowers' statements would show it.*

---

## 10. Greybrook Realty Partners FIT 63 / 100 · B

Equity investor / syndicator · Toronto

#### THE EVIDENCE

Inferred: explicitly an equity investor alongside “best-in-class developer partners” and “execution partners,” each reporting on its own system; the income-producing US multifamily fund is third-party operated. [Source](#)

#### PORTFOLIO

\$2.5B invested equity, 115+ investments, 10,000+ investors; large-scale residential development plus value-add and income-producing US multifamily fund

## THE READ

Development-weighted, which the profile excludes; the income-producing US multifamily fund is the fit. Ten thousand investors is a reporting obligation on a schedule. Re-verify the contact before sending.

## WHO TO APPROACH

Greg Tanzola — Executive Director, Asset Management (re-verify before outreach).

### THE APPROACH

*You invest alongside developer and execution partners, and each one reports on its own system — the income-producing US multifamily fund especially, where the operators are local. How do partner statements come onto one basis for ten thousand investors, and where is the trail when one of them asks where a number came from? 1LEDGR reads every partner's statements as they come, puts them on one standard, and keeps every figure tied to its page. Thirty minutes on three partners' statements?*

## CALIFORNIA

### 11. Presidio Property Trust FIT 92 / 100 · A+

Small-cap REIT · San Diego · Nasdaq: SQFT

## THE EVIDENCE

SEC annual report: the company “subcontracts with third-party property management companies in California and North Dakota for on-site services, while maintaining internal management in Colorado, Maryland, and Texas.” Direct. [Source](#)

## PORTFOLIO

12 commercial properties (10 fee, 2 via affiliates) + 80 model homes (12/31/25); commercial in CA, CO, MD, ND, TX; ~131 tenants; 15 full-time employees

## THE READ

The demo form's placeholder in real life: twelve properties, five states, mixed third-party and in-house management, fifteen people, public reporting. The strongest fit in either market and the first California call.

## WHO TO APPROACH

Ed Bentzen — Chief Financial Officer.

### THE APPROACH

*Twelve commercial properties in five states, third-party managed in two of them and in-house in three, with fifteen people and an audit committee waiting on the numbers — a lot of formats for a small team to reconcile every quarter. 1LEDGR reads every manager's statements, whatever the chart of accounts, puts them on one basis, and keeps every figure traceable to the page it came from: the trail the audit committee asks for. Thirty minutes on your California and North Dakota managers' statements?*

## 12. Cove Capital Investments FIT 89 / 100 · A

DST sponsor · Torrance

### THE EVIDENCE

Inferred, strongly: 134 properties in 36 states run from one Torrance office by a team of about fifteen, with no regional offices — on-site management is necessarily third-party, per trust. [Source](#)

### PORTFOLIO

134 properties, 4.1M+ sq ft, 36 states, \$1.083B+ in offerings, 2,721 investors; debt-free DSTs

### THE READ

One office, thirty-six states, 2,700 investors: each trust reports on its own manager's basis, and every investor statement is built from those. The questions are how many managers, and how long consolidation takes.

### WHO TO APPROACH

Ted Vidmar — Chief Financial Officer.

### THE APPROACH

*One hundred thirty-four properties in thirty-six states, run from one office in Torrance — which means a local manager per trust and a different statement format for each. How are those consolidated for 2,700 investors, and how long does it take? 1LEDGR reads every manager's statements as they arrive, puts them on one basis, and keeps every figure tied to its source page. Thirty minutes on three trusts' statements would show it on your own numbers.*

---

## 13. Pacific Oak Capital Advisors FIT 81 / 100 · A

Non-traded REIT sponsor · Los Angeles

### THE EVIDENCE

Inferred: an externally managed non-traded REIT sponsor with 29 assets across 18 US markets from one Los Angeles office; the executive bench is asset and transaction management, and no property-management division is named. [Source](#)

### PORTFOLIO

\$3.1B AUM; 29 properties, 11.1M+ sq ft, 18 US markets

### THE READ

Twenty-nine properties in eighteen markets is the shape. Asset management is the entry — ranking operators on one basis is the use case that lands with the executive who manages them.

### WHO TO APPROACH

Jeff Rader — EVP, Asset Management. Also Michael Bender — CFO.

#### THE APPROACH

*Twenty-nine properties across eighteen markets and no management division of your own — so every asset reports through a local manager, on that manager's chart of accounts. How many managers is that, and can you rank them on one basis today? 1LEDGR reads every manager's statements, whatever the format, puts them on one standard, and keeps every figure traceable to its page. Thirty minutes on three of your operators' statements?*

---

### 14. Terreno Realty Corporation FIT 74 / 100 · B

Industrial REIT · San Francisco · NYSE: TRNO

#### THE EVIDENCE

10-K for fiscal 2017: “we prefer to utilize local third-party property managers for day-to-day property management.” Direct, but nine years old — confirm in the current filing before use. [Source](#)

#### PORTFOLIO

196 buildings, ~13.0M sq ft + land (FY2017 10-K); six markets: LA, N. NJ/NYC, SF Bay, Seattle, Miami, DC

#### THE READ

Institutional scale and a nine-year-old quote. Re-verify the manager language in the latest 10-K first; if it holds, this is a data-quality conversation with the Chief Accounting Officer, not a small-team pitch.

#### WHO TO APPROACH

Chief Accounting Officer — to be identified (not listed on the pages fetched).

#### THE APPROACH

*Your 10-K says you prefer local third-party property managers for day-to-day management — six markets, six sets of formats and charts of accounts feeding a public close. How do those come onto one basis, and how far can the accounting team trace a consolidated figure back to the manager's page? 1LEDGR reads every manager's statements, maps them to one standard, and keeps every figure tied to its source page. Thirty minutes on three managers' statements?*

---

### 15. Buchanan Street Partners FIT 74 / 100 · B

Investment manager and lender · Newport Beach

#### THE EVIDENCE

Inferred: an SEC-registered investment firm buying across the Western US from one office; the team page lists fund controllers and investment VPs and no property-management function. [Source](#)

#### PORTFOLIO

\$8B+ invested; strategies include real-estate lending, income & growth, value-add storage; deals in NV, AZ

## THE READ

The people who do the consolidation are named — a VP Controller and a Senior Fund Controller — and the lending strategy doubles the use case. Enter at controller level, on the quarter-end close.

## WHO TO APPROACH

Shana Baker — VP, Controller. Also Richard Rishko — Senior Fund Controller.

### THE APPROACH

*Income, value-add storage and a lending book across the Western US, closed each quarter by a controller team in Newport Beach — from statements that arrive in whatever format each manager and each borrower uses. How many formats hit the close, and how long does it take? 1LEDGR reads each statement as it comes, maps it to one standard, and keeps every figure tied to its page. Thirty minutes on three of the most different statements you receive?*

---

## 16. Shopoff Realty Investments FIT 74 / 100 · B

Private investor · Irvine

## THE EVIDENCE

Inferred: no property-management arm on the management team page; an Ohio office property, an Illinois manufactured-housing portfolio and a North Carolina office, all run from Irvine, imply separate local managers.

[Source](#)

## PORTFOLIO

30 properties across 6 states — CA 24, AZ 2, NV 1, NC 1, OH 1, IL 1 (MH portfolio); retail, apartments, office, logistics, manufactured housing

## THE READ

Six states, thirty properties, one CFO, no management arm — the profile's private-owner persona. The out-of-state assets are the opener: they are the ones that certainly report differently.

## WHO TO APPROACH

Jennifer Welker — Chief Financial Officer.

### THE APPROACH

*Thirty properties in six states and no management arm of your own — so the Ohio, Illinois and North Carolina assets report through local managers, in their formats, into one finance team in Irvine. How do those come onto one basis with the California portfolio, and how long does the quarter take to close? 1LEDGR reads every manager's statements as they arrive, puts them on one standard, and keeps every figure traceable to its page. Thirty minutes on the out-of-state managers' statements?*

---

## 17. Thorofare Capital FIT 72 / 100 · B

Private CRE lender · Los Angeles

### THE EVIDENCE

Their own site: “originating, underwriting and asset managing” loans across 34 states and 13 property types — every borrower reports on its own manager’s chart of accounts. Direct. [Source](#)

### PORTFOLIO

\$5.6B+ originated since 2010; loans \$15M–\$75M across 34 states, 13+ property types

### THE READ

The best-shaped lender in California: a national, multi-property-type book asset-managed in-house means continuous borrower monitoring across every format there is. The head of asset management is not named publicly.

### WHO TO APPROACH

Head of Asset Management — to be identified. Kevin Miller — CEO.

### THE APPROACH

*Loans in thirty-four states across thirteen property types, asset-managed in-house — every borrower reporting on its own manager's chart of accounts, in its own format. Who spreads those statements today, and how long before a covenant test is the first one done? 1LEDGR reads each statement as it arrives and puts every borrower on one basis, with each figure traceable to its source page. Thirty minutes on three borrowers' statements would show what continuous monitoring looks like.*

---

## 18. Passco Companies FIT 72 / 100 · B

DST sponsor · Irvine

### THE EVIDENCE

Inferred: a multifamily DST sponsor placing thousands of units nationally from two offices; the DST structure requires a third-party manager per trust, and no property-management division is disclosed. [Source](#)

### PORTFOLIO

\$9.0B total acquisitions, 9,662+ investors (6/30/26); multifamily-led DST sponsor; offices Irvine and Atlanta

### THE READ

A manager per trust by structure, nearly ten thousand investors on a reporting schedule, and no fund-accounting lead named publicly — find the person first.

### WHO TO APPROACH

CFO or Director of Fund Accounting — to be identified.

#### THE APPROACH

*A multifamily DST sponsor placing units nationally from two offices means a third-party manager per trust, each reporting in its own format — and nearly ten thousand investors waiting on the consolidated result. How are trust-level statements brought onto one basis today, and how long does it take? 1LEDGR reads every manager's statements as they arrive, puts them on one standard, and keeps every figure traceable to its page. Thirty minutes on three trusts' statements?*

---

### 19. Harbor Associates FIT 69 / 100 · B

Value-add investor · Seal Beach

#### THE EVIDENCE

Inferred: four principals listed and no property-management, accounting or asset-management staff — a firm this lean, buying across states, outsources management at every asset. [Source](#)

#### PORTFOLIO

Acquires CRE priced \$20M–\$300M across the Western US; industrial/IOS, R&D/life science, creative and traditional office

#### THE READ

Four principals and no back office, buying across several states — everything at the asset is outsourced by necessity. Portfolio size is unpublished, so the first call qualifies the asset and manager count.

#### WHO TO APPROACH

Joon Choi — Principal (a CFO or controller, if one exists, to be identified).

#### THE APPROACH

*Industrial, R&D and office across the Western US, bought and run by a four-person team — which means a local manager at every asset and a different statement format for each. How many managers is that today, and who turns their reports into one package for your capital partners? 1LEDGR reads every manager's statements as they come, puts them on one basis, and keeps every figure tied to the page it came from. Thirty minutes on three of your managers' statements would show it on your own numbers.*

---

### 20. Kay Properties & Investments FIT 69 / 100 · B

DST marketplace / advisor — channel partner · Torrance

#### THE EVIDENCE

Inferred: a channel rather than a buyer — clients hold DSTs from many sponsors, each with its own manager, chart of accounts and reporting format, and Kay is the consolidation point. [Source](#)

#### PORTFOLIO

Marketplace/advisory; 'over 9,100' 1031, DST and 721 exchange investments placed

## THE READ

Not a buyer — a partner. Every Kay client receives statements from several sponsors' managers; a client-reporting layer across sponsors is the conversation, and the President is the person.

## WHO TO APPROACH

Chay Lapin — President. Also Dwight Kay — Founder.

### THE APPROACH

*Your clients hold DSTs from many sponsors, and every sponsor's manager reports differently — so the client sees several formats and no single basis. What would it be worth to hand them one consolidated view, with every figure traceable to the sponsor's page? 1LEDGR reads each sponsor's statements as they come and puts them on one standard. Thirty minutes to look at it across three of the sponsors your clients hold?*

## HOW TO READ THE GRADE

The grade is fit, scored on six things that can be checked from outside — how many managers feed the owner, who is waiting for the consolidated numbers, how spread out the portfolio is, how thin the team is, how mixed the assets and structures are, and what size band it sits in. Nothing unobservable is in it. Where the evidence is inferred rather than stated, the grade is capped: a B here means the right shape, with the manager count still to confirm. What each account is doing right now — hiring someone to reconcile managers' reports, a new CFO, an acquisition in a new city — is a separate signal layer that starts next cycle and sets the order of calls.

## WHAT THIS IS

A first run on public information only. The engine had a website and a working week, and nothing yet from the people who built the product — this is the least it will ever know. It is built to be adjusted: change the profile, the markets, the evidence bar or the scoring, and the next cycle runs on the new rules. Every name is re-checked the day before any outreach.

## TWO WAYS TO WORK IT

The 1LEDGR team runs the outreach in its own name from briefings like this one, with TridentRise maintaining the engine behind the scenes — or TridentRise runs the outreach as well, opening first conversations through its own network, qualifying against the profile, and handing over booked walkthroughs with the context attached.

*Which of these you engage — and how it goes — is your call. When an account moves forward, gets set aside, or comes back to life later, a quick note back sharpens the engine for the next cycle. No formal reply is required; the decision on whether to reach out sits with you.*

The engine, the buyer profile, and the method — [tridentrise.github.io/1ledgr-engine](https://tridentrise.github.io/1ledgr-engine)

1LEDGR × TridentRise · Cycle #01 · Sent from [michael@tridentrise.com](mailto:michael@tridentrise.com)
